EDUCATION

AISSMS IOIT

Aug 2022 - Aug 2026

B.Tech Electronics and Telecommunication with minor in Computer Science

Pune, India

TECHNICAL SKILLS & COURSEWORK

Coursework: Data Structures & Algorithms, Database Management System, Network Security, Object Oriented Programming, Machine Learning, Operating Systems, Web Development

Languages: C++, JavaScript, TypeScript, SQL, Python, Embedded C

Technologies/Frameworks: Git, React, React Native, Redux, Next.JS, Rest API, Firebase, Docker

EXPERIENCE

The Foodie Bee Pvt Ltd 🔗 | SDE Intern

July 2024 - Dec 2024

- Migrated two web apps from MERN to Next.js with TypeScript, enhancing scalability, performance, and reducing load time by **20%**. Implemented Docker for efficient and containerized deployments.
- Developed a cross-platform mobile app in React Native, integrated RESTful APIs, and improved mobile user engagement by **40%**. Utilized Redux and Zustand for state management.
- Redeveloped the company website in Next.js, leveraging Server-Side Rendering to cut load time by **35%**. and integrated performance optimization techniques, boosting user retention by **25%**.

BNB Developers 🔗 | Full Stack Intern

Aug 2023 - Jan 2024

- Collaborated on a Client's Camping Management System using MERN Stack, optimizing user experience and boosting operational efficiency by **40%**. Implemented real-time features for improved user interactions.
- Developed a comprehensive Admin Panel using the MERN stack, restructured the MongoDB database, improving query performance by **25%**, and revamped the UX/UI for a smoother user flow. Integrated JWT authentication and role-based access for enhanced security.

PROJECTS

s3-upload-tool 🔗 | NPM Package

Dec 2023 - Jan 2024

- A Node Package designed to simplify and streamline the process of uploading files to AWS S3.
- It provides a streamlined API for file validation, progress tracking, and resumable uploads, making it a great addition to any project that needs reliable file storage solutions.
- Included extensive documentation and examples, assisting developers in quickly understanding and implementing the package, reducing development time by **40%**.

UniSpace 🔗 | ReactJS, MongoDB, ExpressJS, NodeJS, Docker

Feb 2024 - Mar 2024

- A Web Application to assist university students by providing access to previous year papers, reference books in PDF format, and financial support through free resources, eliminating the need for purchasing textbooks.
- Enabled students to upload their notes, creating a repository that aids fellow students in finding study materials.

StyleSwipe 🔗 | Myntra hackathon

june 2024 - july 2024

- The Project addresses key challenges in trend identification and active user engagement. By making style discovery both fun and rewarding, StyleSwipe transforms fashion interaction on Myntra.
- honoured to be among the top **3%** selected teams from 30,000 teams

ACHIEVEMENTS

WON 2nd PLACE at "INNOVATE FOR INDIA" Hackathon | Won 4 digit cash prize over 300 teams

VICE PRESIDENT at IEEE AISSMS IOIT | Tenure 2024-25
